Sample test stimuli generated for different faults are shown in the Table below. Note that in general, multiple test vectors exist for faults. So the tests from your program may not be the same as these. The best way to check is by running your fault simulator on your generated test vectors to see if the relevant faults are detected

Circuit	Fault	Test Stimulus
s27.txt	Net 16 s-a-0	X0X10X0
	Net 18 s-a-1	11X101X
s298f_2.txt	Net 70 s-a-1	01X1XXXXXXXXXX0XX
	Net 92 s-a-0	X10101XXXXXX0X0XX
s344f_2.txt	Net 166 s-a-0	01X00XXXXX011XX0XXXXXXXX
	Net 91 s-a-1	111XXXXXXXXXXXXXXXXXXX
s349f_2.txt	Net 25 s-a-1	XXXXXXXXXXXXXX1XXXXXXXX
	Net 7 s-a-0	XXXXXX1XXXXXXXXXXXXXXXX
